TOOLS TO CREATE A DIGITAL LEARNING ENVIRONMENT FOR YOUNG LEARNERS (K-6)

Creating and implementing digital learning environments promote engagement, community, and accessibility for all learners.

FLIPGRID

Video discussion/video sharing used to create learning materials

KAHOOT!

Trivia game-based learning used for reviewing topics, preparing for assessments and more

NEARPOD

Interactive learning experience(s) through quizzes, polls, videos

WHY IS DIGITAL LEARNING IMPORTANT?

"Digital classrooms also provide a more engaging and interactive learning environment for students. They are able to access information and resources more easily, and they can communicate with their classmates and teachers more easily. Additionally, digital classrooms can be customized to meet the needs of each individual student, which can make learning more efficient and effective." — Bryce Purnell, founder of Learn Laugh Speak.

Repeating importance: Engagement

CLASSDOJO

Online learning community (connect with parents, teachers, and, students) that offers a point system to enhance the management ofclassroom behavior

Bethany Cratsenberg, 2023
MSEd, Educational Technology Specialist
Cratsebf202@potsdam.edu

EDPUZZLE

Interactive video lessons with guided questions to enhance comprehension

IXL

Creates personalized guidance for each learner through diagnostic assessments

SEESAW

Curriculum reinforcement, communication, portfolio-based assessment
