# ChatGPT and the Future of Learning

What is ChatGPT?

ChatGPT is an AI chatbot that can not only answer questions but generate any type of writing.
- emails
- letters
- essays
- poems
- books
- software code
- and many more

Why It Matters

- ChatGPT debuted in November 2022, and many are concerned about how it will impact teaching and learning.
- Microsoft has invested billions of dollars into the company OpenAI for its ChatGPT technology, and it's likely this technology will only advance and become more accessible.

Impact on Learning

- Cheating and learning loss
  - AI detection tools
  - revising student codes of conduct
- Innovative ways of teaching and learning
  - teaching critical AI literacy
  - new assignments

Assignment Examples

- Use in the writing process for...
  - invention
  - revision
  - locating sources
- Ask students to compare their own writing with AI generated writing.
  - "What are its limitations?"
  - "How is my writing style unique?"

Questions for Educators

- How do we teach students critical AI literacy
- How do we address AI writing in the student code of conduct?
- How will assignments and rubrics change?
- How can we use ChatGPT to enhance learning?
