

# Artificial Intelligence: New Era for Students and Educators

By: Karina Stewart

## What is AI?

- The ability for a computer to do tasks that people would do very quickly
- Analyzes data in order to answer questions and solve problems

## Why was this poster created?

- Discuss the presence of AI in schools
- Technology is growing rapidly in education
- To inform how educators and students are using AI
- AI as a tool in education has positive and negative impacts

## How is AI used by Educators?

- Create lesson plans
- Grade assignments
- Write IEPs
- Find resources to improve teaching

## How is AI used by Students?

- Brainstorm ideas
- Find academic resources
- Language Translator
- Studying
- Content Creation

## Benefits of AI

- Learning is more personalized
- Efficient learning and teaching
- Reduce work load
- Increased engagement
- Fast feedback

## Challenges of AI

- Cheating on assignments
- Dependence on technology
- Bias
- Privacy
- Training involved which can be cost effective
